Two Senator Kapenga Bills Become Law

Madison – Today, two bills authored by Senator Chris Kapenga (R-Delafield), were signed by Governor Walker.

Senate Bill 148, received a voice vote in the Senate and passed unanimously in the Assembly to authorize the operation of Personal Delivery Devices (PDDs) on sidewalks and crosswalks. This bill allows entrepreneurs to employ an innovative solution to one of the most costly portions of the product supply chain, the so-called “last mile”. This bill recognizes and retains local control by enabling municipalities to prohibit personal delivery devices on sidewalks in their municipality.

“This act empowers Wisconsin entrepreneurs to utilize the technology of the future to better serve their customers, and get government out of the way of progress,” said Senator Kapenga.

Additionally, the Governor signed Assembly Bill 25, into law, removing a barrier to employment for young people in Wisconsin, especially for vulnerable, unaccompanied and homeless youth. AB 25 eliminates an unnecessary layer of bureaucracy for families, employers, and school districts that required 16 and 17 year olds to obtain a work permit as well as pay a fee to be eligible for employment.

“With the signing of AB 25, Wisconsin joins 31 other states in making it easier for youth to gain employment and build the skills for success later in life,” Kapenga said.
